

WEB TECHNOLOGIES II

MID-SEMESTER EXAMINATION

The Bolgatanga Technical University SRC hired you to create an executive membership portal for the council. Members must log in to see their dashboard, which welcomes them by name and shows a simple status message. Unauthenticated users should be redirected to the login page.

Portal Requirements

1. Database (MySQL):

- Create a database named “**btu_src_portal**”.
- Create a table “**users**” with columns:
 - id (INT, auto-increment, primary key)
 - email (VARCHAR, unique)
 - password_hash (VARCHAR)
 - full_name (VARCHAR)

2. Front-End

- **HTML/CSS:**
 - a. login.html: Form with **Email** and **Password** inputs, plus a submit button.
 - b. dashboard.php: Displays “Welcome, [Full Name]!” and a “Logout” link.
 - c. Show errors in red.

- **JavaScript:**

Client-side validation:

- a. Email must match `/^[^\\s@]+@[^\\s@]+\\.[^\\s@!]+$ /`
- b. Password $\geq$ 8 characters.
- c. Prevent form submission on invalid data and show inline error messages.

3. Back-End (PHP)

login.php

Accept POST from login.html.

Connect to MySQL using sql

Verify the submitted password against the stored password_hash

On success, start a session and store the user's id and full_name. Redirect to dashboard.php.

On failure, redirect back to login.html with an error message.

dashboard.php

Require an active session. If none, redirect to login.html.

Fetch full_name from the session and display.

logout.php

Destroy the session and redirect to login.html

Files to be delivered

SQL file btu_src_portal.sql (sample user).

Front-end files: login.html, styles.css, script.js.

PHP files: login.php, dashboard.php, logout.php.
